

A [Tropical Birding](#) SET DEPARTURE tour

## ECUADOR: The Andes Introtour and High Andes Extension

10<sup>th</sup> - 19<sup>th</sup> November 2019

TOUR LEADER: Jose Illanes

Report and photos by Jose Illanes

*Andean Condor from Antisana National Park*

This is one Tropical Birding's most popular tours and I have guided it numerous times. It's always fun and offers so many memorable birds. Ecuador is a wonderful country to visit with beautiful landscapes, rich culture, and many friendly people that you will meet along the way. Some of the highlights picked by the group were **Andean Condor**, **White-throated Screech-Owl**, **Giant Antpitta**, **Jameson's Snipe**, **Giant Hummingbird**, **Black-tipped Cotinga**, **Sword-billed Hummingbird**, **Club-winged Manakin**, **Lyre-tailed Nightjar**, **Lanceolated Monklet**, **Flame-faced Tanager**, **Toucan Barbet**, **Violet-tailed Sylph**, **Undulated Antpitta**, **Andean Gull**, **Blue-black Grassquit**, and the attractive **Blue-winged Mountain-Tanager**. Our total species count on the trip (including the extension) was around **368** seen and **31** heard only.

*Torrent Duck at Guango Lodge on the extension*

**November 11:** After having arrived in Quito the night before, we had our first birding this morning in the Yanacocha Reserve owned by the Jocotoco Foundation, which is not that far from Ecuador's capital. Our first stop was along the entrance road near a water pumping station, where we started out by seeing **Streak-throated Bush-Tyrant**, **Brown-backed Chat-Tyrant**, **Cinereous Conebill**, **White-throated Tyrannulet**, a very responsive **Superciliaried Hemispingus**, **Black-crested Warbler**, and the striking **Crimson-mantled Woodpecker**. Once we arrived at the reserve, we checked out the fruit feeders near the parking lot, where we saw **Gray-browed** and **Yellow-breasted Brushfinches** and the colorful **Scarlet-bellied Mountain-Tanager** coming to eat some bananas. The hummingbird feeders brought us the aggressive **Shining Sunbeam**, **Tyrian Metaltail**, **Buff-winged Starfrontlet**, **Great Sapphirewing** (the second largest hummingbird in the world), and the bizarre and most wanted **Sword-billed Hummingbird**. An **Ocellated Tapaculo** was skulking in the bushes nearby but only some were able to see it. After spending time at the feeders, we took a walk along the main trail, where we saw the **Tawny** and **Undulated Antpittas** hopping in front of us. While following them down the trail, we ran into small flock with **Hooded Mountain-Tanager**, **Blue-backed Conebill**, **Pearled Treerunner** and the attractive **Spectacled Redstart**, which came out and gave us nice looks. Continuing along the trail, we found **Rufous Antpitta** and **Blackish** and **Spillmann's Tapaculos** (unusual at this high elevation). All the way at the end of the trail were more hummer feeders, where we saw a lot of the same hummingbirds plus **Golden-breasted Puffleg**, as well as **Masked** and **Glossy Flowerpiercers**. We got really lucky with a White-throated Screech-Owl calling during the day that we tracked down, an unexpected bonus. After having lunch at the reserve restaurant, we started driving towards Tandayapa Bird Lodge along the Old Nono-Mindo Road where we made some stops for birding. The first spot brought us **Golden Grosbeak**, **White-sided Flowerpiercer**, **Blue-capped** and **Rufous-chested Tanagers**, and a **Red-crested Cotinga** perched in the open. Farther along, we found a small mixed feeding flock with **Black-capped**, **Golden-naped**, **Beryl-spangled**, and **Metallic-green**

**Tanagers, Cinnamon and Streak-necked Flycatchers, and White-winged Brushfinch. Torrent Tyrannulet and White-capped Dipper** were also seen along the rushing Alambí river as well. We reached Tandayapa before dusk, settling into our rooms and getting ready for dinner and the checklist.

*Gray-browed Brushfinch from Yanacocha Reserve*

**November 12:** We felt lucky being in this unique and special place surrounded by cloud forest and amazing birds. Before breakfast, we went to visit the forest blind not far from the lodge, where we enjoyed watching **Streak-capped Treehunter, Scaly-throated Foliage-gleaner, Three-striped and Russet-crowned Warblers, White-throated Quail-Dove**, and both male and female **Zeledon's Antbirds** coming in to feed on those juicy moths. Back at the lodge, while enjoying our breakfast, the fruit feeders brought in **Black-capped and Golden Tanagers, Blue-winged Mountain-Tanager, Crimson-rumped Toucanet, Orange-bellied and Thick-billed Euphonias, Rufous Motmot**, and the colorful and striking **Red-headed Barbet** eating the tasty bananas provided by lodge staff. For the rest of the morning, we went to the upper Tandayapa Valley, where the slightly higher elevation holds a lot of different species. Once we arrived, we quickly saw **Golden-headed Quetzal, Turquoise Jay, and Powerful Woodpecker**, all fantastic birds. A while later we found a few small feeding flocks with **White-tailed Tyrannulet, Brown-capped Vireo, Striped Treehunter, Pearled Treerunner, Streaked Tuftedcheek, Azara's Spinetail, Golden-crowned Flycatcher, Dusky Chlorospingus, Smoky Bush-Tyrant, and Green-and-black Fruiteater** which gave especially nice views. After some more walking, we tacked down **Streak-headed Antbird, Speckled Hummingbird, Collared Inca**, the regional endemic **Gorgeted Sunangel**, and an evasive **Plate-billed Mountain-Toucan** that eventually came into view.

*Golden-headed Quetzal*

After this very productive morning, we went back down to the lodge for lunch, and after that we had plenty time to sort through all the hummingbirds coming to the feeders. We counted at least fifteen different species, including **Rufous-tailed Hummingbird**, **Andean Emerald**, **Sparkling, Lesser**, and **Brown Violetears**, **Green-crowned** and **Fawn-breasted Brilliants**, **White-necked Jacobin**, **Booted Racket-tail**, **Buff-tailed Coronet** and the regional endemics **Purple-bibbed Whitetip**, **Purple-throated Woodstar**, **Brown Inca**, and spectacular **Violet-tailed Sylph**. After a siesta, we did some birding around the lodge ground where we saw **Tricolored Brushfinch**, **Tropical Parula**, **Red-faced Spinetail**, **Montane Woodcreeper**, **Whiskered Wren**, **Marble-faced Bristle-Tyrant**, **Uniform Antshrike**, and the rare **Rufous-winged Tyrannulet**.

*Fawn-breasted Brilliant at Tandayapa Bird Lodge*

*Golden Tanager*

*Violet-tailed Sylph from Tandayapa Bird Lodge*

**November 13:** Today we had an early start, taking both breakfast and lunch with us as we headed down to Rio Silanche. Everyone was excited to get down to the lower and warmer elevations, knowing that we would see many new wonderful birds. We had breakfast along the entrance road to the reserve, where there was a lot of traffic from a nearby gravel quarry, but that didn't stop us from birding. At the edge of a clearing we saw one the tiniest woodpeckers **Olivaceous Piculet**, along with **Slaty Spinetail**, **Golden-olive** and **Black-cheeked Woodpeckers**, **Plain Xenops**, **Lesser Greenlet**, **Bay-headed**, **Golden-hooded**, and beautiful **Blue-necked Tanagers**, and a noisy **Yellow-tailed Oriole** singing from a tree top. After this productive start, we went to bird along a quieter part of the road, where we picked up many more species like **Lineated Woodpecker**, **Variable** and **Yellow-bellied Seedeaters**, **Thick-billed Seed-finch**, **Masked Water-Tyrant**, the elegant **Pale-legged (Pacific) Hornero**, **Guira Tanager**, **Yellow-crowned Tyrannulet**, **Snowy-throated Kingbird**, **Streak-headed** and **Wedge-billed Woodcreepers**, **Hook-billed Kite**, and we had great looks at a **Laughing Falcon** perching along the roadside. Also, just before getting to the reserve, we had a **Barred Puffbird** sitting right above the road. We arrived at Rio Silanche Bird Sanctuary late in the morning, where we couldn't resist a visit to the canopy platform. Soon we saw a **Double-toothed Kite**, low flying **White-collared**, **Gray-rumped**, and **Lesser Swallow-tailed Swifts**, **Bronze-winged Parrot**, and **Marron-tailed Parakeet**. We had our packed lunch up here while waiting for more birds to come by, and sure enough a scarce **Lanceolated Monklet** perched not far from us. We enjoyed seeing some of the regional endemic species like **Choco Trogon**, **Choco Tyrannulet**, **Scarlet-browed Tanager**, and **Orange-fronted Barbet**. Later on we took a hike along a nicely built trail, where we saw **Scarlet-rumped Cacique**, **Purple-throated Fruitcrow**, **Black-striped Woodcreeper**, **Purple-chested**

**Hummingbird, Purple-crowned Fiery, Stripe-throated Hermit, and Band-tailed Barbthroat.** Just before leaving, near the parking lot, we found a big feeding flock with **Checker-throated Stipplethroat, Tawny-crested Tanager, Yellow-tufted Dacnis, Yellow-margined Flycatcher, Black-headed Tody-Flycatcher, Dot-winged Antwren, Dusky-faced Tanager,** and a noisy **Rufous-tailed Jacamar.** We drove back to the lodge, with a bunch of new birds in the bag, ready for a nice dinner and the checklist.

*Lanceolated Monklet at Rio Silanche Bird Sanctuary*

*Stripe-throated Hermit from Rio Silanche Bird Sanctuary*

**November 14:** After breakfast at the lodge, we headed to Milpe Bird Sanctuary, a sister reserve of Silanche owned by Mindo Cloud Forest Foundation. Almost as soon as we got there we were seeing **Silver-throated, Lemon-rumped, and Golden-naped Tanagers**, a fantastic **Rufous Motmot**, **Orange-billed Sparrow**, **Green Honeycreeper**, **Red-headed Barbet**, and a bunch of **Collared (Pale-mandibled) Araçaris** coming to get bananas from the feeders. The hummingbird feeders brought us **White-whiskered Hermit**, **Green-crowned Brilliant**, **Green-crowned Woodnymph**, and the foothill jewel **Green Thorntail**. For rest of the morning, we birded along the trails. We bumped into a nice mixed feeding flock, where we encountered **Buff-throated** and **Scaly-throated Foliage-gleaners**, **Smoky-brown Woodpecker**, **Rufous-rumped** and **Slaty Antwrens**, **Choco Warbler**, **Striped (Western) Woodhaunter**, the noisy **Dusky-faced Tanager**, **Spotted Barbtail**, **Slaty-capped Flycatcher**, the cute **Ornate Flycatcher**, and the Chocó endemic **Gray-and-gold Tanager** feeding in the canopy. Before leaving the reserve, we were able to spot a **Collared Trogon**, the unusual **Crested Guan**, **Plumbeous Hawk**, **Broad-billed Motmot**, and the melodic **Spotted Nightingale-Thrush**. Afterwards, went to have lunch at a local restaurant called Mirador Rio Blanco. Beside the good food, they also have a nice lookout and feeders as well. Most of the species we had seen before, but enjoyed better looks at some, like **Blue-gray, Palm, Golden, Silver-throated, and Blue-necked Tanagers**. We also picked up **Ecuadorian Thrush** and the rare **Emerald Tanager**, which was very good. After lunch, we head back towards the lodge via the Upper Tandayapa Valley, finding an **Olivaceous Piha** along with many of the other birds we had seen the first time. Since it was rainy, we also spent more time enjoying the activity at Tandayapa's amazing feeders.

*Emerald Tanager from Mirador Rio Blanco*

*Golden-winged Manakin from Mashpi*

**November 15:** Today we visited the Mashpi area and the Amagusa Reserve, which is owned by a young couple named Doris and Sergio. I really enjoy the birding here due to the high concentration of Choco endemic species, and many of them are really good-looking. We started birding at the beginning of the Mashpi road, which turned out to be very productive, as we saw a feeding **Golden-winged Manakin**, a flying **Rose-faced Parrot**, a few **Orange-breasted Fruiteaters**, **Choco Vireo**, **Andean Solitaire**, and the scarce **White-tipped Sicklebill** which came in to one of the flowering Heliconia plants. Once we reached Amagusa, we headed straight to their fruit feeders, which are some of the best around. Lots of birds were coming in like **Golden**, **Golden-naped**, **Flame-rumped**, and **Flame-faced Tanagers**, **Golden-collared Honeycreeper**, and Choco specialties like **Moss-backed**, **Rufous-throated**, and **Glistening-green Tanagers**. This place is truly paradise. On the hummer feeders we saw a bunch of the species that we had seen before, along with **Empress Brilliant** and the charming **Velvet-purple Coronet**, one of my favorite species in this family. We were also lucky to see a young male **Long-wattled Umbrellabird** while watching the feeders. Another set of feeders inside the forest had a few different birds like **Black-winged Saltator**, **Crimson-rumped Toucanet**, and the rainbow-colored **Toucan Barbet**. Later in the morning we did some more road birding, picking up **Indigo Flowerpiercer**, **Cinnamon** and **White-winged Becards**, great views of **Golden-headed Quetzal**, and the cute **Club-winged Manakin** doing his dance. Since we had some time, he headed to lower elevation to look for other birds. While driving this quiet road, we had a nice feeding flock with **Russet Antshrike**, the rare and unusual **Gray-mantled Wren**, and the attractive **Slaty-capped Shrike-Vireo**. Much farther down we had some **White-thighed Swallow** and even the rare **Black-tipped Cotinga**, which I thought was brilliant bonus. Just before calling it a day we had **Collared (Pale-mandibled) Araçari** and **Yellow-throated** and **Choco Toucans**, all in the same tree which was excellent. Eventually, we head back to Tandayapa for our final night in this great lodge.

*Lyre-tailed Nightjar from Amagusa Reserve*

*Glistening-green Tanager from Amagusa Reserve*

**November 16:** Today was our last day birding on the western slopes of the Andes. After checking out of Tandayapa, we first went to the famous Refugio Paz de las Aves. As soon as we arrived, we visited the **Andean Cock-of-the-rock** lek, watching a few males doing their best to attract any females in the area. Besides them, at the same spot, we had **Golden-headed Quetzal**, **Masked Trogon**, and **Strong-billed Woodcreeper** as well.

After enjoying this first show, Mr. Paz told us it was time to move on to get other species as well. One of them was **Giant Antpitta**, and after waiting for a little while, we had a nice encounter with this very special bird. Later in the morning we went to try for other species like **Chestnut-crowned Antpitta** and the shy **Yellow-breasted Antpitta**, and they were already waiting for us as we arrived. A quick stop by the feeders by their new restaurant brought us **Golden, Black-capped, and Flame-faced Tanagers, Blue-winged Mountain-Tanager**, and the spectacular **Toucan Barbet** as well. We even saw a **Choco Daggerbill** (the new name for a bird that used to be called Wedge-billed Hummingbird) at a flowering bush. There was time to try for one more antpitta species, and on the way down the trail we caught up with the rare (in this area) **Yellow-vented Woodpecker** which was pecking holes in a tree. **Ochre-breasted Antpitta** was already waiting for its worms when we got to the feeding area, and after this unique experience, we headed back up to enjoy some hot drinks and local snacks, *bolones* which are made with green plantains, and some *empanadas*. After this we started driving to Quito, with one more stop at Calacalí. Birding this dry, scrubby habitat got us **Band-tailed Seedeater, Ash-breasted Sierra-Finch, Golden Grosbeak, Tropical Mockingbird, Common Ground-Dove, Blue-and-yellow Tanager**, the cute **Tufted Tit-tyrant**, and a superb male **Golden-rumped Euphonia**. We quickly stopped at the famous Equator monument for some pictures and then headed to our hotel in Puembo, the last night of the main tour, though the driver and I got to spend the night in our homes in Quito.

*Giant Antpitta from Refugio Paz de Las Aves*

*Yellow-breasted Antpitta from Refugio Paz de Las Aves*

**November 17:** Those not joining the extension flew home today, and the rest of us headed up into the high Andes to Antisana National Park, one of my favorite areas. This park holds awesome birds and visitors always enjoy the beautiful landscapes as well. Our first stop was just below the park boundary, where we started birding dry scrubby habitat, giving us our first looks of **Giant Hummingbird** perched on a bare tress, **Brown-backed Chat-Tyrant**, flying **Carunculated Caracaras**, **Red-crested Cotinga**, **Blackish Tapaculo**, **Black Flowerpiercer**, **Cinereous Conebill**, and a friendly **Plain-colored Seedeater** too. A short drive farther took us to one of the **Andean Condor** viewpoints, where we had our first views of this majestic Ecuadorian National Bird sitting on a cliff face across the valley. Later on we saw them several more times, and even had close-up views and photos of this marvelous bird with its nine foot wingspan. Higher up in the park we found the striking **Ecuadorian Hillstar**, **Plumbeous Sierra-Finch**, **Black-winged Ground-Dove**, **Stout-billed** and **Chestnut-winged Cinclodes**, a **Great Horned Owl** roosting on a rock face, which was gazing at us sleepily. Higher up we entered the grassy paramo and encountered more high Andes species like **Andean Gull**, **Plain-capped Ground-Tyrant**, **Andean Lapwing**, a soaring **Variable Hawk**, and we even had an awesome view of **Paramo Pipit** with some worms in his bill. Our visit to La Mica Lake was also successful as we saw the species that we were hoping for like **Andean Duck**, **Slate-colored Coot**, **Andean Teal**, **Yellow-billed Pintail** and the cotton-like **Silvery Grebe**. As we were coming back down for lunch in one of the local restaurants, we had a family of **Cinereous Harriers** and at least four **Andean Condors**, two adults and two juveniles. Hummer feeders at the restaurant attracted **Shining Sunbeam**, **Great Sapphirewing**, **Tyrian Metaltail**, **Sparkling Violetear**, and the elegant **Black-tailed Trainbearer**. It was time to move on to our next destination, which was the Guango Lodge. We arrived with enough light to watch hummers at the feeders, with **Buff-tailed** and **Chestnut-breasted Coronets**, **White-bellied Woodstar**, **Sword-billed Hummingbird**, **Collared Inca**, **Tourmaline Sunangel**, **Long-tailed Sylph**, and **Glowing Puffleg** all coming in as we waited. The lodge staff offered us some *canelazo*, a cinnamon beverage optionally spiked with local aguardiente, which really helps warm you up on a cold evening!

*Andean Condor from Antisana National Park*

*Black-tailed Trainbearer from Antisana National Park*

**November 18:** It was our last birding day of the trip, and we wanted to visit a few new places for some last new trip birds. Right after breakfast, we started along the trails behind the lodge where we found some bold **Turquoise** and **Inca Jays**, noisy **Mountain Caciques**, a nice feeding flock with **Gray-hooded Bush Tanager**, **Capped Conebill**, **Rufous Wren**, **Pearled Treerunner**, **Spectacled Redstart**, **Black-eared Hemispingus**, **White-banded Tyrannulet**, **Montane Woodcreeper**, and the colorful **Lacrimose Mountain-Tanager**. Along the river we had managed to spot a **White-capped Dipper** and even a **Torrent Duck** resting on a rock, a “most wanted” bird for some. Our next stop was the road to Cayambe-Coca National Park. After a short walk, an **Andean Pygmy-Owl** responded to its call, bringing in other birds with it like **Black-chested Mountain-Tanager** and **Viridian Metaltail**. Farther along the same road we saw the rare **Masked Mountain-Tanager** and a **White-chinned Thistletail**. Heading back down, we saw a **Paramo (Culpeo) Fox** by the parking lot and then the **Agile Tit-Tyrant** that we had been looking for. After a field lunch, we stopped by Papallacta Lake where we saw **Slate-colored Coot**, **Neotropic Cormorant**, **Yellow-billed Pintail**, **Andean Teal**, **Spotted Sandpiper**, and **Lesser** and **Greater Yellowlegs**. For our final birding, we drove up the road to the antennas from Papallacta Pass, where we were looking for high elevation species, and fortunately the weather conditions weren’t that bad at all. On our way up we found the rare **Red-rumped Bush-Tyrant**, **Many-striped Canastero**, **Andean Tit-Spinetail**, and an unexpected **Jameson’s Snipe** was seen way up on a mountainside. The last new bird for the trip was a male **Blue-mantled Thornbill** that showed up near the park ranger’s house, which was a great way to end our trip. We returned to the hotel in Puembo near the airport, where we did our last bird checklist and said our goodbyes. In the end, the tour was very fun and productive, and we saw a bunch of wonderful birds. Thanks to all!
